

Time series

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1

Soil temperature 10cm below the surface (normalized)

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1

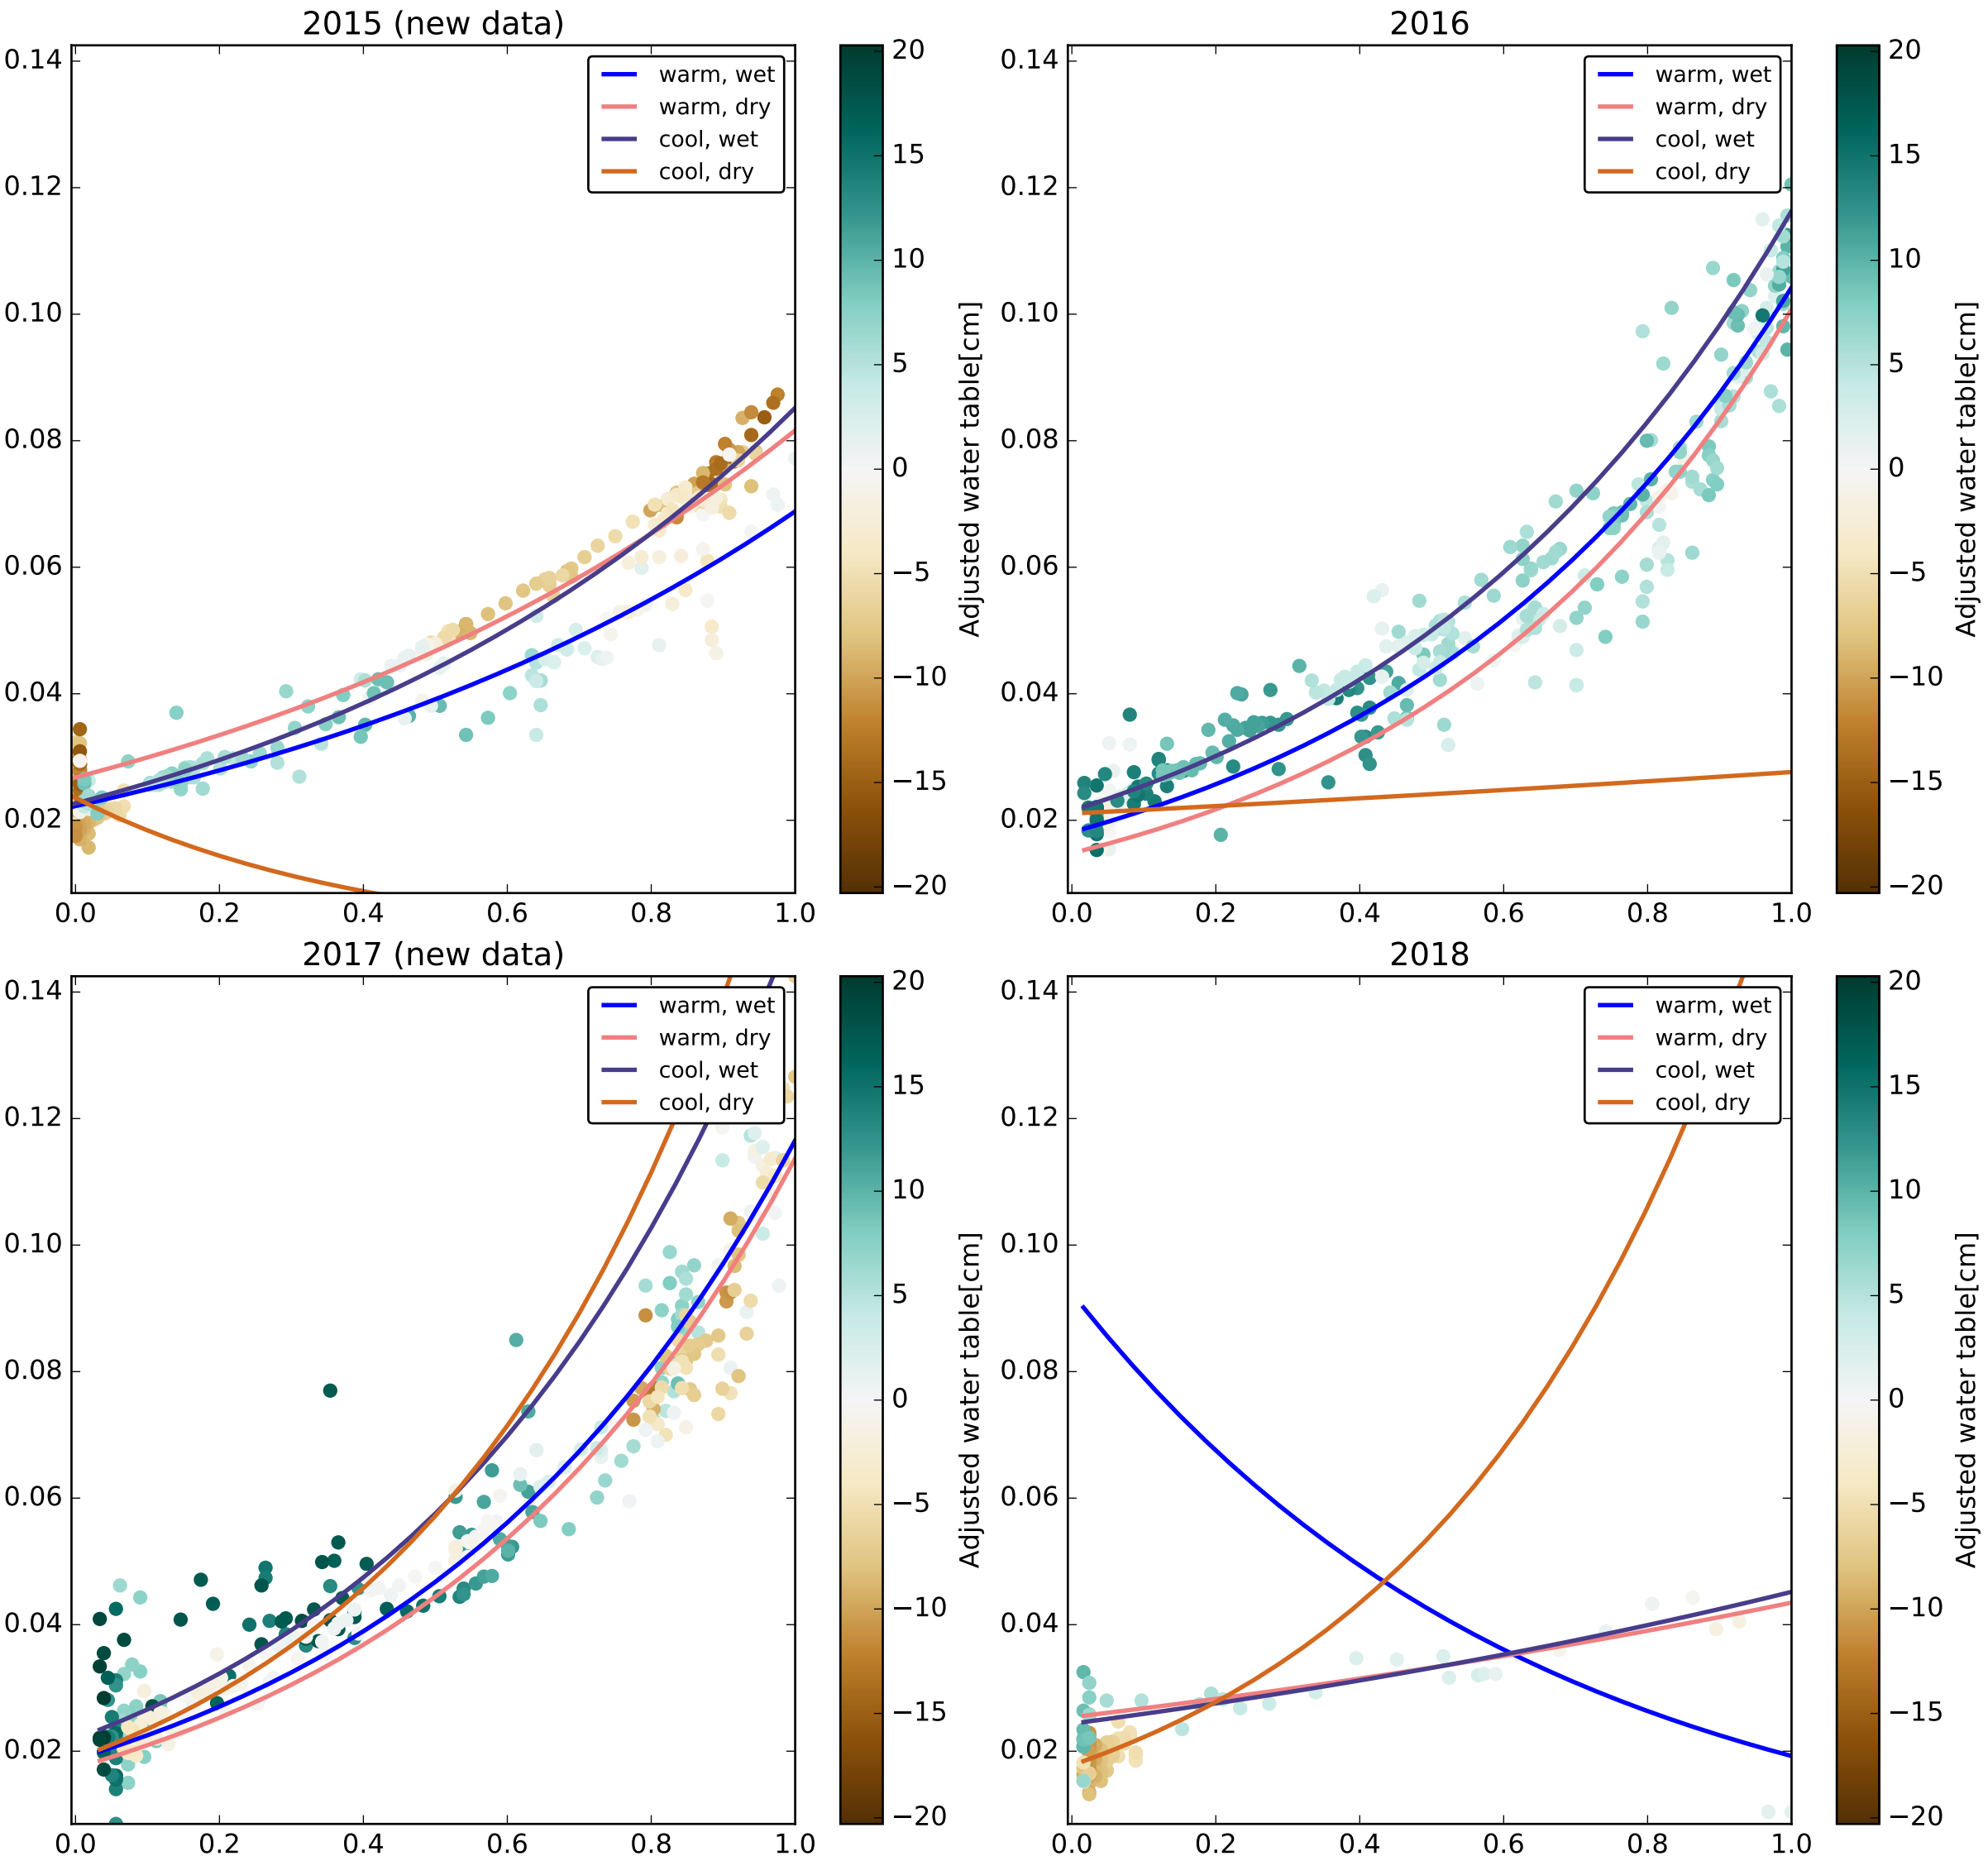

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1

Soil temperature 10cm below the surface (normalized)

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1 (deviations from expected)[cm]

Adjusted water table[cm]

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1 (deviations from expected)[cm]

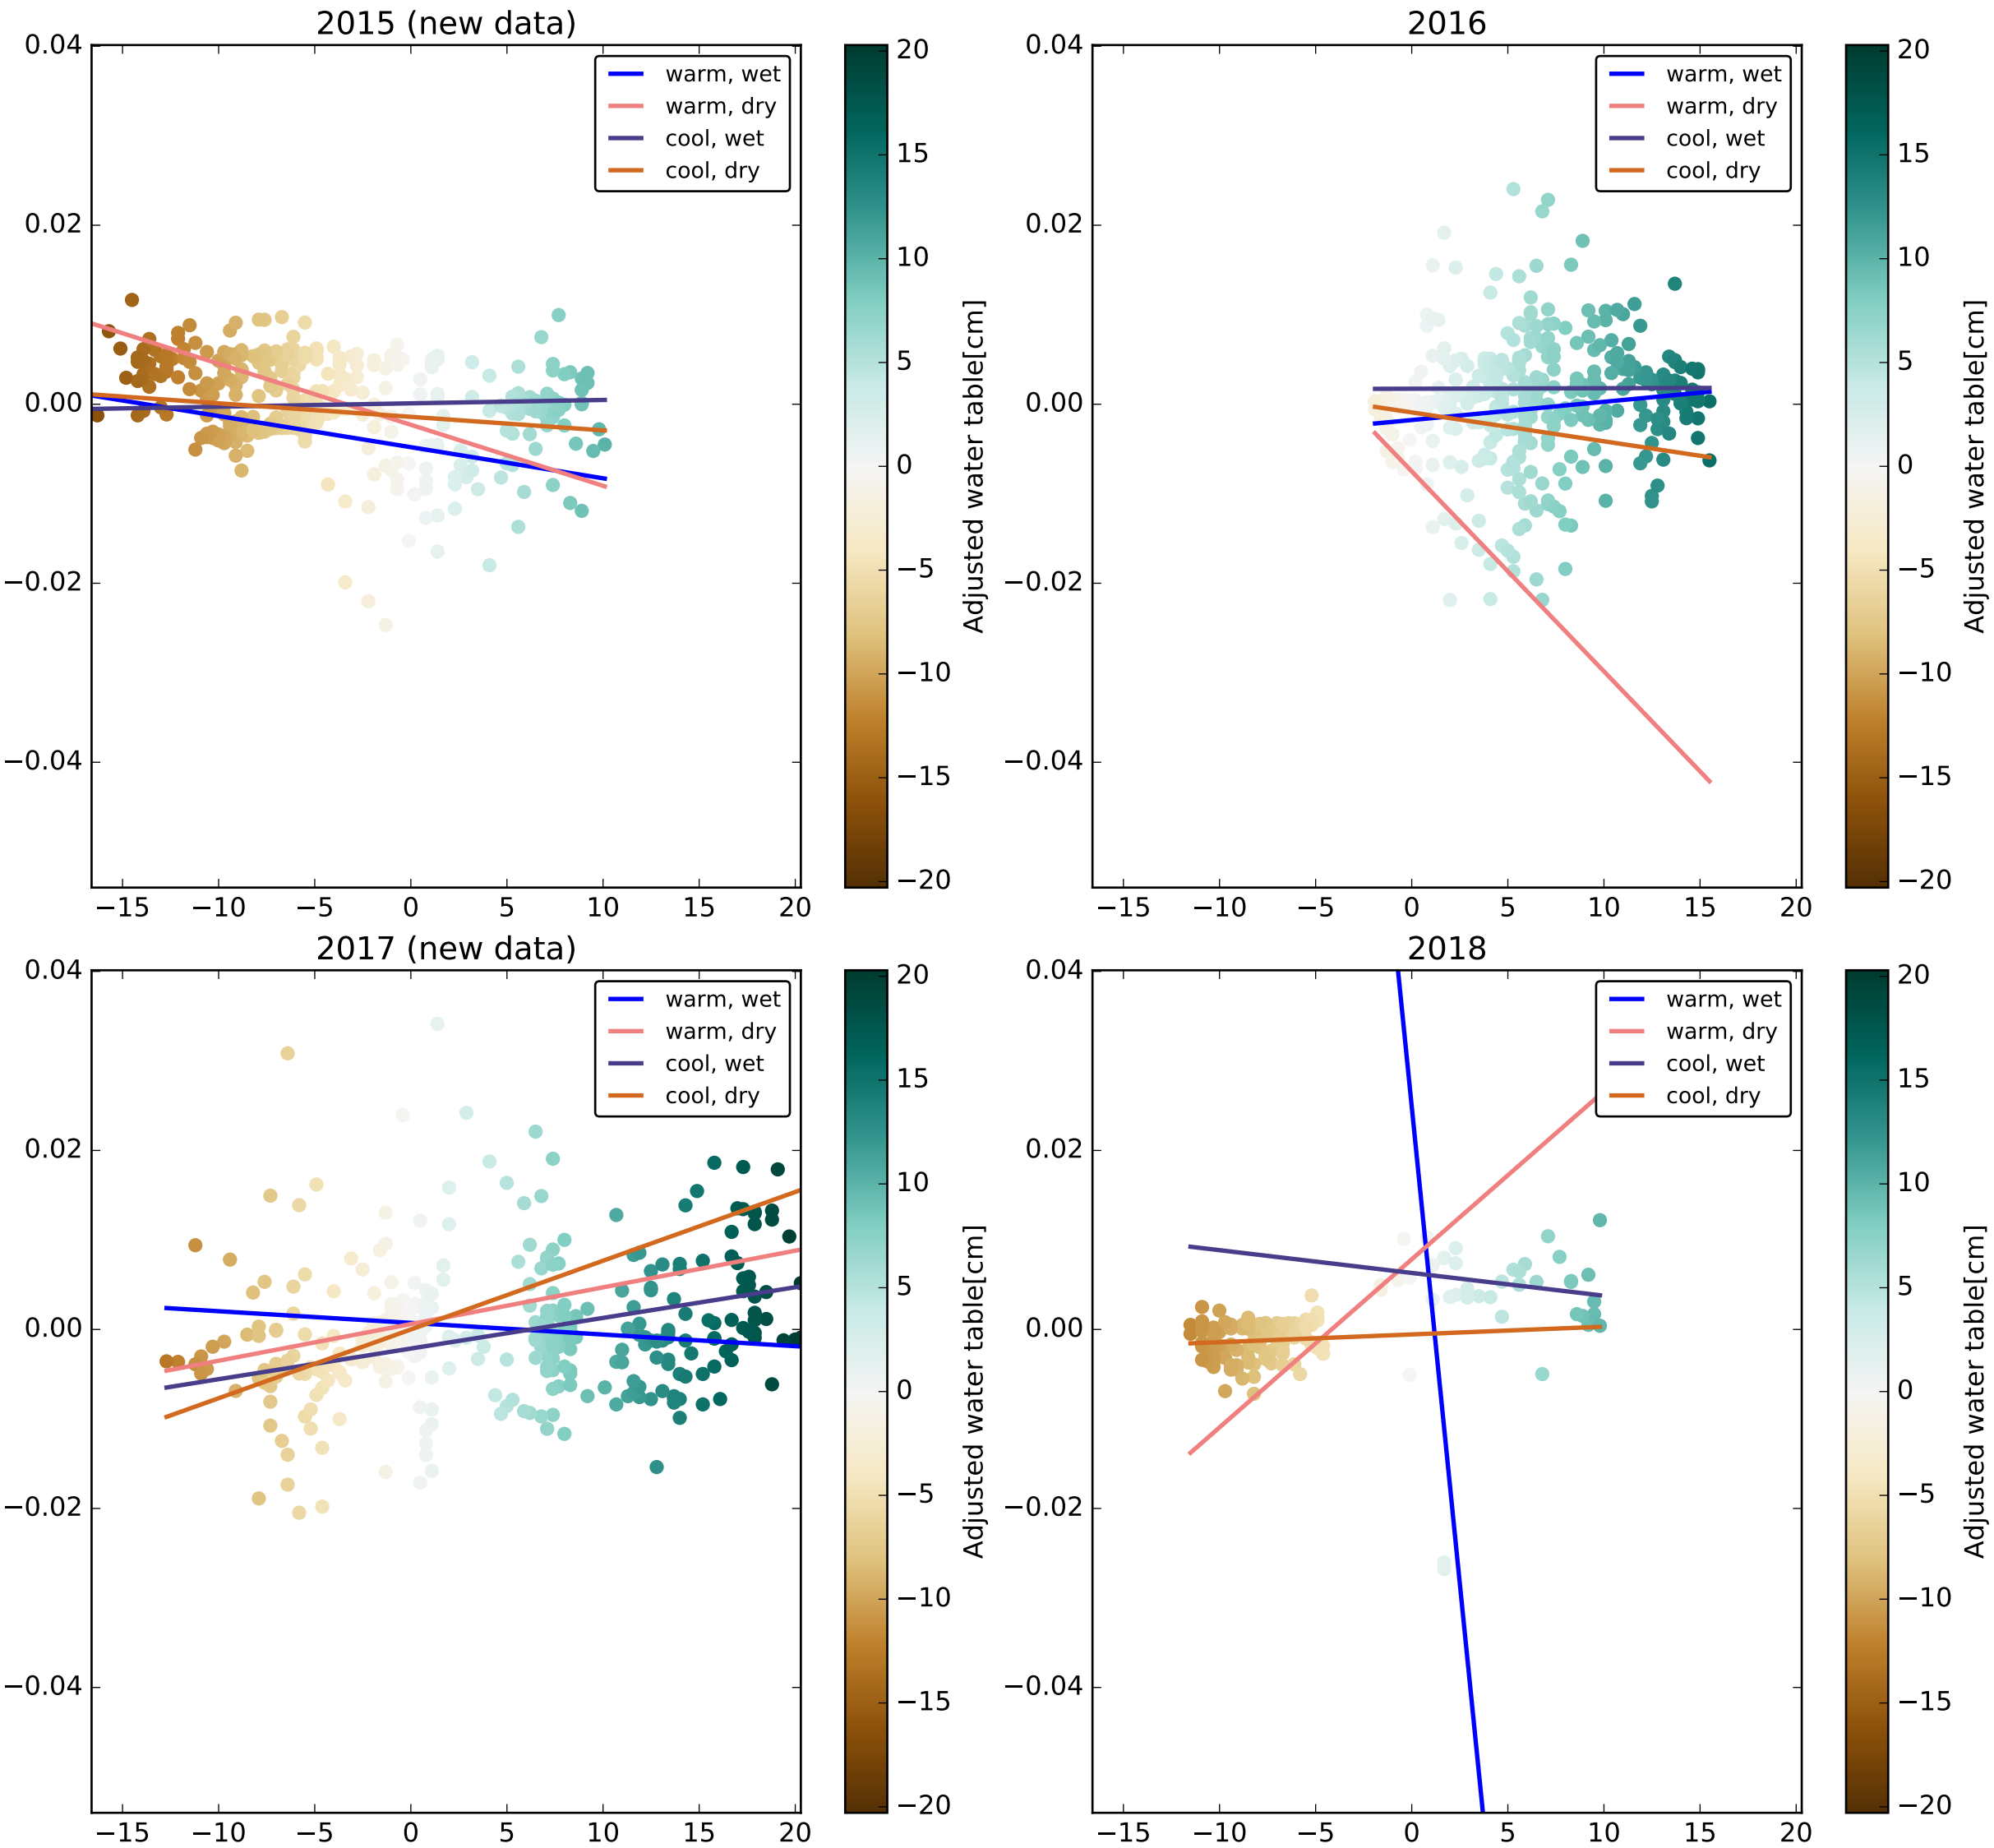

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1 (deviations from expected)[cm]

Water table influence on methane emissions, depending on if peatland is inundated or aerated

Methane S1 (deviations from expected)[cm]

Adjusted water table[cm]
